## Project Profile

### 1. Sky Mobile – UK (May 2024 – Till Date)

Environment	Java, Spring Boot, GIT, Oracle, Rest Web service, Cucumber, Kafka, Docker
Role	Offshore Lead developer
Team Size	10

#### Description:

The Sirius application is used to facilitate mobile purchases for UK customers through multiple channels, including Direct and Digital. It leverages various microservices to handle updates related to Customer, Account, Portfolio, and Billing information. Sales Processing Service manages sales transactions, including cancellations. Fulfilment Processing oversees the creation and update of customer profiles and portfolios, integrating with multiple components based on the order content.

#### Responsibilities:

- Requirement analysis, technical story creation, coding, Code review and mentor to the junior developers.
- Executing unit test cases and Functional testing.

### 2. Sky Care – UK (March 2023 – May 2024)

Environment	Java, Spring Boot, GIT, Oracle, Rest Web service, Cucumber, Kafka, Docker, JBPM
Role	Offshore Lead developer
Team Size	10

#### Description:

In this project, an application is used for Agent or Retail engineers to support the customers in the customer care service. Usually, customer calls the agents to report any Broadband, Mobile or TV related issues. Agent will run the specific test for each service and provide support for the customers. If the solution is not satisfied, then Agent can arrange Engineer visit to the customers place or Agent can raise the replace option for the defective devices.

#### Responsibilities:

- Requirement analysis, technical story creation, coding, Code review and mentor to the junior developers.
- Executing unit test cases and Functional testing.

### 3. Plant Monitoring Tool – France (Aug 2021 – March 2023)

Environment	Java, Spring Boot, JPA, GIT, PostgreSQL, Angular, Rest Web service
Role	Offshore developer
Team Size	20

#### Description:

In this project, an application is used Tracking the day-to-day activities of employees, machines and work progress. Total number of people employed in the organization and their working hours. List of employees and the amount paid by the organization. Calculation of wages, tax benefits and funds etc. Estimation of machining/man hours or can be related to cost for a specific period.

#### Responsibilities:

- Requirement analysis Change request document preparation and coding.
- Executing unit test cases and Functional testing.

### 4. National Healthcare Group – Singapore (Dec 2018 – Aug 2021)

Environment	Java, Spring Boot, JPA, GIT, Oracle, WAS9.0, Rest Web service
Role	Offshore developer
Team Size	15

#### Description:

In this project, one application is used in Hospital Emergency department to handle the patient details from admission to discharge in the hospital. Another application is ePOS (electronic Polyclinic Outpatient System) is used to handle the outpatient functionalities like appointment, service and billing. In the existing application we are working on new changes and parallelly migrating into microservices.

#### Responsibilities:

- Requirement analysis Change request document preparation and coding.
- Executing unit test cases and Functional testing.

### 5. Walmart Tax application and Decree – Brazil (Sep 2015 – Nov 2018)

Environment	Java, Spring, JPA, GIT, DB2, WAS7.0, Rest Web service
Role	Offshore developer and Onsite Lead
Team Size	20

#### Description:

In this project, one application is used to create tax components and associate it with the items of Walmart. This application is also used to maintain the item tax

association. Another application acts as an interface by which items enters through tax system. This application also exposes a web service that get the item similar to the new item that is arriving in tax system and associated the tax of the similar item to the new items. This system also has various scheduled jobs to alert few external systems about the tax changes that happen every day.

**Responsibilities:**

- Requirement analysis, SRD preparation and coding.
- Handled the team and coordinated with Onsite lead.
- Worked as an Onsite lead during the requirement gathering and the implementation phase.

6. HoGaming – New game Development (Aug 2012 – Aug 2015)	
Environment	Java, JSP, Servlets, SQL Server 2008, JavaScript, SVN, Apache Tomcat
Role	Developer
Team Size	6

**Description:**

This is the module comes under HoGaming product. This is the new game, which is part of HoGaming live dealer games. One on many Blackjacks is a variation of blackjack game. One on many Blackjacks is based on card games and live dealer games. The development is based on the game rules and casino-based requirements. Games rules are developed based on the socket communication using Socket API. The dealer and player interface are developed for this game purpose. The dealer interface is developed by using Java Applet client. In this game, the player can be able to make bet on maximum three seats and can participate in the game.

**Responsibilities:**

- Requirement analysis and unit test case preparation.
- Coding and implementation.
- Executing unit test cases and Functional Bug Fixing.
